FOR IMMEDIATE RELEASE
February 1, 2017

WAUKEGAN, IL – PEER Bearing Company today unveiled its new FLEXWORKS Center in which customers can request custom modifications to currently stocked inventory. In today’s competitive bearing market, flexibility and speed-to-market mean the difference between profit and loss for many companies. PEER’s product modification services and customized solutions provide companies both large and small a competitive edge.

PEER offers a large in-stock inventory for customization to meet the individual needs of every customer. Focusing on product customization for specific applications and requirements changes the dynamic from a commodity mentality and shopping on price to real solutions that meet customers’ immediate needs. As a reliable partner, PEER’s highly skilled engineering application specialists are available to support you on product selection and customization decisions.

“When large bearing manufacturers say ‘No’ or require huge minimum order quantities, PEER’s FLEXWORKS Center offers our customers a unique, one-stop shop for the product they need, when they need it. And since PEER controls the entire manufacturing process, end-users can be assured that we’ll stand behind the quality of the product – even if it’s been modified,” said Joe Kahn, Head of Distribution Sales for PEER Bearing Company.

Customization services include:

- Addition and/or removal of grease
- Drilling of oil holes
- Grooves and snap rings
- Addition and/or removal of closures
- Modifications to housings

- Mounted unit assembly
- Laser-etched markings
