PEER Bearing Company Expands Tapered Roller Bearing Product Offering for Industrial Gearbox Market

WAUKEGAN, IL – PEER Bearing Company today announced the optimization of tapered roller bearing (TRB) design and manufacturing capabilities to meet the needs of industrial gearbox OEM's that produce Worm, Parallel, and Bevel gearboxes.

“The investment in both design optimization and manufacturing will position PEER TRB products to achieve longer service life in operation, improve gearbox operating efficiency, and reduce assembly time and cost,” said Steve Tomlinson, Transmission Business Development Manager for PEER Bearing. “The advancements further strengthen PEER as a partner supplier of robust and cost-effective TRB and deep groove ball bearing (DGBB) solutions for Industrial Gearbox OEM's,” he added.

PEER TRB and DGBB inch and metric solutions comply with international bearing standards and are easily interchangeable for use in existing gearbox designs. Major Gearbox OEM's rely on PEER's range of DGBB and TRB solutions to achieve performance expectations and keep their gearboxes running. PEER will continue to service the industry with knowledgeable industry focused, Application Engineers that collaborate with customers to select the best bearing solution to meet the application needs in the most cost-effective way.

About PEER

PEER Bearing is a manufacturer and global supplier of reliable ball and roller bearing solutions to target industries including agriculture, distribution, electrical, fluid, industrial transmission, material handling and on and off-highway. PEER employs over 1,600 people with offices in Brazil, China, Germany, Italy, Mexico and the United States. PEER is an award winning supplier dedicated to reliable and cost-effective bearing solutions.
