FOR IMMEDIATE RELEASE
February 21, 2017

WAUKEGAN, IL – PEER Bearing Company is pleased to announce the achievement of the ISO 9001:2015 Quality Management Systems Standard Certification. Previous to transitioning to the ISO 9001:2015 standard this December, PEER has maintained ISO 9001:2008 certification since 2007.

“This certification is a testament to our strong focus on quality and an integral part of our continuous improvement culture. By meeting the criteria for this standard, PEER demonstrates our commitment to our customers and to our quality processes,” said Brian Cohen, President, North America Sales for PEER Bearing Company.

In September 2015, the International Organization for Standardization released a new revision of the ISO 9001 standard, giving ISO 9001:2008 certified organizations three years to transition. With over 1.1 million certificates issued worldwide, ISO 9001 helps organizations demonstrate that they can offer products and services of consistently good quality to their customers. It also acts as a tool to streamline processes and make them more efficient at what they do. To achieve certification, PEER partnered with SAI Global, an independent third party.

About PEER
