PEER Bearing Company unveils new Mower Deck Spindle Assembly

WAUKEGAN, IL – PEER Bearing Company, a leader in maintenance-free bearing solutions, introduces a mower deck spindle assembly designed specifically for the lawn and garden industry. Mower deck spindles are the most vulnerable component on the machine. Damage occurs most frequently by contamination and improper handling during assembly.

“By working directly with OEM’s, PEER identified several major issues with spindle assemblies that led to premature failure and inadequate performance. Our extensive sealing knowledge and experience in bearing assemblies allowed us to develop a high-performance solution that addressed these concerns, increasing reliability and spindle life,” explained Keith Hospodarsky, Business Development Manager, Agriculture.

PEER spindles deliver improved contaminant exclusion by utilizing PEER’s proven TURFXTREME™ seal technology. For added impact resistance, the housing is manufactured using high-strength ductile iron which provides a 60% increase in strength over traditional aluminum housings.

About PEER

PEER Bearing is a manufacturer and global supplier of reliable ball and roller bearing solutions to target industries including agriculture, distribution, electrical, fluid, industrial transmission, material handling and on and off-highway. PEER employs over 1,600 people with offices in Brazil, China, Germany, Italy, Mexico and the United States. PEER is an award winning supplier dedicated to reliable and cost-effective bearing solutions.
